

Patient Engagement

Get Real Health's InstantPHR[®] built on the Caradigm[®] Intelligence Platform can enhance patient engagement and satisfaction with powerful tools that put the patient at the center of care.

The Caradigm Intelligence Platform, the next generation of Amalga, aggregates and normalises clinical, financial and operational data from across the care continuum to connect providers and populations with powerful applications to support improvements in clinical quality outcomes, financial performance and operational effectiveness. Through our robust platform and diverse application ecosystem, Caradigm enables the cross-boundary collaboration necessary to unleash innovation, unlock insight and transform care.

Unleashing Innovation

The Caradigm Intelligence Platform provides a foundation for rapid innovation. Its application development framework makes it easy to build rich solutions that leverage clinical, financial and operational data. The goal is to empower industry partners to develop healthcare applications that help advance quality, reduce costs and improve outcomes through the strategic use of data.

Get Real Health is an award-winning global health technology pioneer on the leading edge of patient engagement and connected care solutions for healthcare organisations. The company unlocks vital health information and modernises how individuals and families access, understand, and pro-actively empower themselves through an integrated platform designed to enhance the health and overall quality of life for a wide range of patient populations.

Unlocking Insight

Get Real Health's InstantPHR[®] is a comprehensive patient engagement platform that leverages the robust data aggregation and normalisation features of the Caradigm Intelligence Platform. InstantPHR is a patient centric platform that can be used to configure web and mobile applications for a wide variety of use cases and clinical environments. It offers a portal with more than 200 patient and provider health empowerment and activation tools that can be configured to meet the needs of healthcare organisations and their patient populations. Built for a wide variety of hospital and ambulatory providers and their patients, InstantPHR helps healthcare organisations share important health information with patients, educate them about their health conditions, and track progress and outcomes outside of facility walls,

ABOUT GET REAL HEALTH

Founded in 2001 and headquartered in Rockville, Maryland, Get Real Health is an award-winning global health technology pioneer specialising in patient engagement and connected care solutions. Get Real Health's flagship product — InstantPHR[®] — is an electronic toolbox for creating and configuring personal health applications. For more information visit: www.getrealhealth.com.

Patient Engagement

thereby facilitating chronic disease management, care transitions and readmissions rate reductions. Additionally, InstantPHR provides important health alerts and self-management action plans to patients, their providers and family caregivers; all designed using relevant personal health information.

The widget-based, patient-focused solution provides a number of different flexible tools, allowing users to develop care plans that inform and engage. Highlights include:

- User-friendly web and mobile interface
- Simple, personalised and prescriptive actions for patients
- Ability to easily skin the site to match the hospital or organisation's brand
- Fully configurable
- Integrated with device ecosystems allowing patients to easily connect home health devices, wearables, and health tracking apps
- Available in multiple languages (includes support for right-to-left languages such as Arabic)

Transforming Care

By enabling access to a wealth of data not otherwise easily accessible to health-care organisations, the Caradigm Intelligence Platform and InstantPHR can deliver an effective solution to enhance patient engagement and satisfaction; as well as positively impact ROI by potentially reducing readmissions.

Organisations may benefit by experiencing:

- Better compliance by patients with care treatment plans
- Reduced patient readmissions to the hospital
- Increased use of patient engagement portal from user-friendly design and innovative health trackers that make data relevant to patients and providers
- Caradigm's portfolio of solutions demonstrates the power of our intelligence platform and the applications built on top of it to provide the insights health-care enterprises need to manage clinical outcomes and financial performance now – and in the future.

ABOUT CARADIGM

Caradigm is a health IT company formed by GE Healthcare and Microsoft in 2012. The joint venture is a healthcare analytics and population health company dedicated to helping organisations improve care, reduce costs and manage risk. It combines the power of an open technology platform and collaborative clinical applications to bring together disparate patient data and transform it into intelligence as well as driving efficiencies in how clinicians access data.
