Get Real Health

Patient Engagement

DATA SHEET

Get Real Health's InstantPHR™ built on the Caradigm™ Intelligence Platform can enhance patient engagement and satisfaction while helping organizations advance toward their Meaningful Use goals.

The Caradigm Intelligence Platform, the next generation of Amalga, aggregates and normalizes clinical, financial and operational data from across the care continuum to connect providers and populations with powerful applications to support improvements in clinical quality outcomes, financial performance and operational effectiveness. Through our robust platform and diverse application ecosystem, Caradigm enables the cross-boundary collaboration necessary to unleash innovation, unlock insight and transform care.

Unleashing Innovation

The Caradigm Intelligence Platform provides a foundation for rapid innovation. Its application development framework makes it easy to build rich solutions that leverage clinical, financial and operational data. The goal is to empower industry partners to develop healthcare applications that help advance quality, reduce costs and improve outcomes through the strategic use of data.

Get Real Health is an award-winning global health technology pioneer on the leading edge of patient engagement and connected care solutions for healthcare organizations. The company unlocks vital health information and modernizes how individuals and families access, understand, and pro-actively empower themselves through an integrated platform that may enhance the health and overall quality of life for a wide range of patient populations.

Unlocking Insight

Get Real Health's InstantPHR™ is a comprehensive patient engagement platform that leverages the robust data aggregation and normalization features of the Caradigm Intelligence Platform. InstantPHR is a highly customizable, patient centric toolkit that can be used to configure web and mobile web applications for a wide variety of use cases and clinical environments. It offers a customizable portal with more than 200 patient and provider health empowerment and activation tools. Built for a wide variety of hospital and ambulatory providers and their patients, InstantPHR helps healthcare organizations share important health information with patients, educate them about their health conditions, and track progress and outcomes outside of facility walls, thereby facilitating chronic disease management, care transitions and readmissions rate reductions. Additionally, InstantPHR provides important health alerts and self-management action plans to patients, their providers and family caregivers; all designed using relevant personal health information.

ABOUT GET REAL HEALTH

Founded in 2001 and headquartered in Rockville, Maryland, Get Real Health is an award-winning global health technology pioneer specializing in patient engagement and connected care solutions. Get Real Health's flagship product—InstantPHR™—is an electronic toolbox for creating and customizing personal health applications. For more information, visit: www.getrealhealth.com.

Patient Engagement

The widget-based, patient-focused solution provides a number of different flexible tools, allowing users to develop care plans that inform and engage. Highlights include:

- User-friendly web and mobile interface
- Simple, personalized and prescriptive actions for patients
- Ability to easily skin the site to match the hospital's brand
- Fully customizable
- Available in multiple languages
- Meets Meaningful Use Stage 2 requirements for patient engagement

Transforming Care

By enabling access to a wealth of data not otherwise easily accessible to healthcare organizations, the Caradigm Intelligence Platform and InstantPHR can deliver an effective solution to enhance patient engagement and satisfaction; as well as positively impact ROI by potentially reducing non-reimbursable readmissions and assisting organizations to realize key Meaningful Use objectives.

Organizations may benefit by experiencing:

- Better compliance by patients with care treatment plans
- Reduced patient readmissions to the hospital
- Increased use of patient engagement portal for Meaningful Use incentives

Caradigm's portfolio of solutions demonstrates the power of our intelligence platform and the applications built on top of it to provide insights healthcare enterprises need to manage clinical outcomes and financial performance now – and in the future.

ABOUT CARADIGM

Caradigm is a healthcare analytics and population health company dedicated to helping organizations improve care, reduce costs and manage risk through the strategic, timely and compliant use of data generated across the healthcare continuum.
